# Sick of Paperwork? Time for a Tech Checkup.

Improve patient care with digital records and automation added to your EHR

Even with today's electronic health record (EHR) systems, nearly a third of primary care doctors still spend 20 hours or more per week on paperwork[1]. As Dr. Donald Rucker, National Coordinator for Health Information Technology, notes: "Federal, state, and local governments, along with the private sector, have worked together to help digitize health information and healthcare. Yet, much work remains."

Healthcare organizations are reducing paperwork and adding muscle to their EHRs with intelligent information management systems that help them:

• Deliver better patient services by securely accessing digitized medical and billing records at anytime from anywhere.

• Streamline administrative operations by automating common back-office tasks and eliminating manual data entry and file handling.

• Avoid costly fines by complying with Healthcare Insurance Portability and Accountability Act (HIPAA) rules on record privacy and timely access.

Right information in the right hands at the right time

Information management is critical to effective healthcare delivery. "The ability for patients, care providers and back-office staff to communicate and exchange information—unadulterated and unaltered—determines success," AIIM notes.[2]

The easy, affordable PaperVision® information management suite integrates easily with EHRs to effectively manage your medical records and business files and speed the delivery of potentially life-saving information.

Less Paperwork Means More Time for Patients

Retrieve medical history and other critical patient files in seconds

With the PaperVision suite, access and share complete patient records in seconds.

> "Staff members are now able to answer requests for infomation much faster. We would never have been able to build our paperless processes without ImageSilo®." - Susan Marseille, Benefits Specialist, Advocate Healthcare. **Read more >**

Advocate Health Care

Gain efficiency across your entire healthcare organization

Digitize paper records and automate common business processes to redirect the savings while supporting remote work and sustainability.

> Woodstock Hospital of Woodstock, Ontario, Canada won a national Return on Investment Award for its use of PaperVision information management tools alongside its EHR system. The hospital saved $437,500 every year in staffing, offsite scanning and office supply costs. And efficiency throughout the hospital has greatly improved." - Kathy Lavelle, CEO, Woodstock Hospital. **Read more >**

WOODSTOCK HOSPITAL

Avoid costly HIPAA fines and record management lawsuits

• Respond to patient record requests in seconds with anytime secure access from anywhere.

• Ensure data privacy with encryption, access controls and multifactor authentication.

• Disaster proof patient and office files by managing records in the cloud.

> Still buried under paperwork after adding an EHR system, Mental Health Center of Denver used PaperVision® Enterprise and PaperVision® Capture to digitize files, comply with HIPAA, improve staff productivity by 90% and save $259,625 a year. It achieved a 1,315% ROI with a six-month payback. **Read more >**
